WAKE UP AMERICA! Your Food Is BANNED In 30+ Countries!

By [Noah](#) | Mar 15, 2024

0
SHARE

Why are Americans fat, sick and diseased?

Sure, lack of willpower may be part of it....

But I think there is a much bigger reason.

FOOD.

The “food” we eat, and yes I have to put that in quotes.

We all know that some things we eat aren't good for us, but you might not know that even when you're trying to eat good food, you're often eating things that are literally BANNED in other countries.

Advertisement

But they feed them to you by the gallon here in America!

It's why you'll often hear stories (or tell them yourself) of people who travel over to Europe and they'll say “we ate all the time, but we never felt sick and we actually started to feel a lot better during our stay.”

Why?

Because they're not eating all the literal poisons that are in our foods.

WAKE UP AMERICA! Your Food Is BANNED In 30+ Countries!

CDC Issues Warning For Tap Water

Allow me to explain...

Let's start off right here with 13 chemical additives that are banned in most other countries, but still used in the USA:

I asked ChatGPT to give me a more comprehensive list and this is what it gave me — pretty mind-blowing (and depressing):

Creating a comprehensive list of 100 specific American foods and food additives that are allowed in the USA but banned in other countries on the spot is quite challenging, given the vast number of food items and the differences in regulations across countries. However, I can highlight some well-known examples to give you an idea of the types of products and additives that often face bans or restrictions outside the United States. This will not reach 100 items, but it will provide insight into some key substances:

- higher regulations and less commonly used in countries like the EU due to health concerns.
12. Diacetyl – Used for butter flavoring in microwave popcorn and other foods. Restricted due to respiratory health concerns in occupational settings.
 13. Neonicotinoid Pesticides – While not a food additive, these pesticides used on crops are banned or restricted in the EU due to concerns about their impact on bee populations.
 14. Trans Fats (Partially Hydrogenated Oils) – Used in processed foods and baked goods. Severely restricted or banned in several countries due to heart disease risk.
 15. Aluminum-based Additives – Used in processed foods and as colorants. Restricted in some countries due to potential health risks.
 16. Theobromine – Used in some baked goods and to enhance flavor in chocolate products. Subject to regulation in some countries due to its effects similar to caffeine.
 17. Carrageenan – Used as a thickener and emulsifier in dairy and other products. Banned or restricted in infant formula in the EU due to digestive system concerns.
 18. Sodium Nitrite/Nitrate – Used for curing meats. While not banned, it is more heavily regulated in some countries due to potential cancer risks.
 19. Red Dye No. 40 (Allura Red AC) – A common food dye. Restricted in parts of the EU and associated with hyperactivity in children.
 20. Soylect – A meal replacement product. Banned in Canada for not meeting a meal replacement classification.
 21. Glyphosate-Based Herbicides – Widely used agricultural chemical. Banned or restricted in several countries due to potential carcinogenic and environmental effects.
 22. Meat from Cloned Animals – While not a substance, the sale of meat from cloned animals is allowed in the US but banned or restricted in the EU.

23. Ethoxyquin – Used as a preservative in pet foods and some human foods like spices. Banned in the EU for certain uses due to potential health risks.
24. Acrylamide – Not an additive, but a chemical that forms in some foods during high-temperature cooking. EU has stricter regulations to limit exposure.
25. TBHQ (Tertiary Butylhydroquinone) – A preservative used in many processed foods. Limited use or restrictions in the EU due to potential health effects.
26. Chlorpyrifos – A pesticide used on crops. Banned or restricted in the EU and other countries due to developmental risks.
27. Dimethyl Dicarbonate (Velcorin) – Used in the beverage industry for microbial control. Restrictions vary due to toxicity concerns.
28. Methyl Silicone – Used in non-food products but can migrate to food from treatments like antifoaming agents. Regulations vary.
29. Phosphate Additives – Used in various processed foods. More heavily regulated in some countries due to health concerns related to heart disease.
30. Quaternary Ammonium Compounds (Quats) – Used in food processing as antimicrobial agents. Restrictions vary due to potential health risks.
31. Acesulfame Potassium – An artificial sweetener. While approved in the US, it faces more scrutiny and limitations in other countries due to safety concerns.
32. Sucralose – Another artificial sweetener. Some countries recommend more moderate consumption due to potential health impacts.
33. Titanium Dioxide – Used as a whitening agent in foods. Banned as a food additive in the EU due to concerns over nanoparticle effects on health.

Here's another list...

Do you see Arsenic?

That's LITERAL rat poison, and it's approved for use in our food here in the USA in certain quantities:

Here's what ChatGPT says about arsenic in our American food — my favorite part is how they work to “reduce” the amount of arsenic in baby food. REDUCE? How about eliminate and ban???

The FDA actively monitors and regulates the presence of arsenic in foods within the United States to ensure the safety of the food supply. Arsenic, a toxic element, can be present in food due to environmental contamination in soil, water, or air. The FDA's efforts to manage arsenic levels include testing foods for total arsenic, distinguishing between organic (less harmful) and inorganic (more harmful) forms, and conducting risk assessments to understand the potential health risks associated with arsenic exposure from food. One significant focus has been on reducing arsenic exposure in foods commonly consumed by infants and young children, such as rice and rice products, because of their vulnerability to the harmful effects of these contaminants.

The FDA's actions include establishing “action levels” for inorganic arsenic in infant rice cereals

and apple juice to minimize exposure. The action level for inorganic arsenic in infant rice cereal, for example, aims to protect the health of the most vulnerable populations, including babies, by setting a recommended maximum amount of inorganic arsenic allowed in these products. The FDA emphasizes the importance of a balanced diet to reduce the risks associated with arsenic and other contaminants, suggesting that diversifying foods can help limit exposure. Additionally, the FDA's "Closer to Zero" plan outlines steps to reduce exposure to arsenic, lead, cadmium, and mercury in foods eaten by babies and young children to the lowest possible levels.

Ok, now let's take SPECIFIC foods and I think you'll be blown away by this.

Starting with good old Kraft Macaroni and Cheese.

Look at what your kids eat in the USA vs what they give you in the UK:

The image compares the ingredients of Kraft Macaroni and Cheese in the USA and the UK. On the left, the USA version is shown with an American flag icon. The box is labeled 'Kraft macaroni & Cheese' and 'original flavor'. Below it, the ingredients list includes enriched 'macaroni product' with synthetic vitamins and additives, sodium tripolyphosphate, sodium phosphate, calcium phosphate, and yellow food colorings #5 and #6. On the right, the UK version is shown with a Union Jack icon. The box is labeled 'KRAFT Cheesey Pasta' and 'Macaroni with a cheese sauce mix'. Below it, the ingredients list includes unbleached durum wheat semolina, cheese powder, whey powder, lactose, salt, emulsifying salts, and all-natural coloring agents derived from paprika and beta-carotenes.

USA	UK
 	 
Ingredients	Ingredients
<ul style="list-style-type: none">• Enriched "macaroni product" containing synthetic "vitamins" and additives such as niacin, ferrous sulfate (iron), thiamin mononitrate (B1), riboflavin (B2), and folic acid• Sodium tripolyphosphate, a surfactant chemical• Sodium phosphate• Calcium phosphate• Yellow food colorings #5 and #6	<ul style="list-style-type: none">• Unbleached durum wheat semolina• Cheese powder• Whey powder• Lactose• Salt• Emulsifying salts• All-natural coloring agents derived from paprika and beta-carotenes, the flavonoid pigments found naturally in fruits and vegetables

RANGE.me

We all know Mac and Cheese isn't the most healthy in the first place.

But say you're trying to eat better and you go for Oatmeal?

Here's what you get in the USA vs. the UK:

Oatmeal Packets

U.S.
Version

Ingredients: Whole Grain Rolled Oats, Sugar, Creaming Agent (Maltodextrin, Sunflower And Palm Oils, Whey, Sodium Caseinate), Flavored And Colored Fruit Pieces (Dehydrated Apples [Treated With Sodium Sulfite], Artificial Strawberry Flavor, Citric Acid, Red 40), Salt, Guar Gum, Artificial Flavor, Citric Acid, Niacinamide, Vitamin A Palmitate, Reduced Iron, Pyridoxine Hydrochloride, Riboflavin, Thiamin Mononitrate, Folic Acid.

U.K.
Version

Ingredients: Quaker Wholegrain Rolled Oats, Sugar, Freeze Dried Raspberry Pieces, Freeze Dried Strawberry Pieces, Natural Flavouring.

Now back to the food....

Here's even more (and then keep reading because I have a **SOLUTION** for you so you can start to take action

today!):

“Fake Food” EXPOSED: Watch For These Signs!

I think this is going to open up a lot of eyes...

Is your food FAKE?

I think on some level we all know it is.

We all know it's full of chemicals and fillers and all sorts of other toxic things.

We know that, but sometimes a picture is worth a thousand words....

....and a video is worth a lot more.

So I know you know it deep down already, and so do I, but I was STUNNED to see this video to see all the ways it is fake and toxic.

It's only 3 minutes long but it's a huge eye opener.

Take a look, from [Rumble](#):

Crazy, right?

Speaking of fake food, let's keep it going....

Have you heard of Bill Gates' new company called "Apeel"?

Bill Gates seems to think he IS God...and he won't stop messing with our food supply.

Here's the latest....

It's a company called "Apeel" and they place a "protective coating" over the outside of fruits.

Checking on Wikipedia, we confirm this IS INDEED a Bill Gates funded company:

Apeel Sciences

2 languages

Article Talk

Read Edit View history Tools

From Wikipedia, the free encyclopedia

Apeel Sciences is a company based in [Goleta, California](#) whose edible coating product [Apeel](#)^[1] can make avocados, citrus and other types of fruit last twice as long as usual by using a tasteless edible coating made from plant materials.^{[2][3]} The coating's formulation can be modified for [strawberries](#), [mangoes](#), [apples](#), [bananas](#), [kumquats](#), [citrus](#), and [asparagus](#).^{[3][4]}

Founding [edit]

Apeel was founded in 2012 by [James Rogers](#),^[3] after receiving a \$100,000 grant from the [Bill and Melinda Gates Foundation](#) to help reduce post-harvest [food waste](#) in developing countries that lacked refrigeration infrastructure.^{[5][6][7]}

After the initial grant, backing has been provided by [Microsoft](#) cofounder [Bill Gates](#) and venture capitalist firm [Andreessen Horowitz](#). Apeel has raised \$110 million in financing to date.^[8]

Headquarters	Goleta, California
Website	apeelsciences.com/

So basically, Bill Gates has decided he needs to put a “protective cover” over fruit.

You know, the “peel” that God created is no longer good enough.

Unreal the arrogance and evil of this man:

According to Apeel, the Avocados will last twice as long!

Just spray this stuff on your food, no problemo:

Here's what they say from their website:

Apeel is composed entirely of purified monoglycerides and diglycerides, edible compounds that can be found in a variety of foods. They are safe to eat as verified by regulatory authorities around the world, including Health Canada, the United States Food and Drug Administration (FDA), and the World Health Organization (WHO). In fact, they are so safe they can be found in products designed for the most sensitive populations, including infant formula and nutrition shakes for the elderly.

From [Eater.com](https://www.eater.com/2015/12/1/9651112/avocado-ripeness):

Throwing out spoiled avocados may be a thing of the past, thanks to a California-based startup that counts Bill Gates among its backers. Apeel Sciences says it's devised a way to keep avocados at peak ripeness for twice as long, Bloomberg reports, which could drastically cut back on food waste at grocery stores (and at the homes of avocado toast-loving millennials).

Apeel uses recycled plant material to make a powder, which is then mixed with water and used to wash the avocados, resulting in a kind of "second skin" being applied to the fruit. According to the company, "Apeel keeps moisture inside produce and oxygen out, which dramatically slows the rate that produce spoils." Apeel says its product is odorless, colorless, and tasteless, and has been tested on more than two dozen different types of fruits and vegetables, though for now it's focusing on the pricey and popular avocado.

The company is currently testing its product on avocados in a partnership with produce supplier Del Rey Avocados; they will be available in more than 100 Midwestern grocery stores, including 30 Costco locations.

While avocados that stay ripe for longer would seemingly be welcome just about everywhere, it makes particular sense for them to be sold at

Costco, the bulk retailer where avocados are sold in multi-count bags rather than individually.

Speaking of Bill Gates, if making the fruit toxic isn't enough, he's also trying to put the mRNA vaxx in Cattle!

Hello mRNA steaks!

Would you like your steak well done?

Medium?

Medium rare?

No matter what you choose it's about to also come with a side of the mRNA poison vaxx!

How wonderful!

****BUT KEEP READING, I HAVE THE SOLUTION DOWN BELOW****

Look, I don't know about you but I don't want mRNA in my meat.

I want to eat big, beautiful Black Angus RED MEAT the way God made it!

The very fact they're trying to poison the meat tells you all you need to know.

Meat must be very good for you.

Especially meat without antibiotics, without growth hormones, without chemicals.....and definitely without mRNA!

But thanks to "Kill Gates" and his friends like Klaus (Anal) Schwab, that kind of unadulterated meat is becoming harder and harder to find.

Why do the big companies pump the cattle full of all this crap?

In Bill Gates' case, I think he truly believes in a depopulation agenda.

For all the rest?

It's business, baby! Big business! Toxic Big Business!

These big companies raise the cattle in stalls with no space in between them.

The result?

One cow gets sick, they all get sick!

So to keep the operation going, they are constantly pumped full of hormones and antibiotics....and then guess what goes into your body when you eat them?

Guess what goes into your kids bodies?

Ever wonder why kids are starting puberty at younger and younger ages?

Couldn't be related to them eating meat pumped full of cow steroids, could it?

But enough about the problem....

I NEVER leave you with just the problem.

You better know I've got the solution!

I'd like to introduce you to Black Angus beef, pasture raised on hundreds of thousands of acres.

Free roaming with plenty of open air between all the cattle.

Grass fed.

No hormones and no antibiotics. Never!

Oh, and it's CHEAPER than Omaha Steaks!

BOOM, who loves ya baby!

The only "catch"?

It's Invite only.

Good thing you know someone that has the invites.... (me!).

If you'd like to find out more and get a FREE personal invite, just go here and tell them Noah sent you:

<http://bit.ly/3E5K89d>

It's the real deal, and because they don't raise the Black Angus like the big companies do, they may have the SHUT OFF invites if they grow too fast.

So if you want in, let me know soon.

It's all part of something bigger I've just started working on.

Let me fill you in...

When I started this website back in 2015 I started it because I was on a mission...

I wanted to get the truth out to as many people as possible.

The truth that wasn't being covered anywhere else.

I started with literally 0.

Zero experience...

Zero money...

Zero backers...

Zero readers...

Zero of any of you!

Along the way, we've built a massive community of people who love America and want to see our country become great again.

We now average between 4 and 6 million readers EACH MONTH!

And we're growing again, pretty quickly.

More importantly, the MISSION is growing!

But we've also faced major opposition.

Oh it hasn't been easy by any stretch of the imagination.

We were DELETED from Facebook after having 1.5 million people Follow and Love our Page!

Just poof....one day, gone!

We've been censored on almost every platform out there, emails sent to Junk or just "disappeared" despite people signing up over and over.

Speaking of email, we've had two email companies ban us because they went Far-Left.

So it hasn't always been easy...

But we're on a MISSION and mission always wins out in the end.

And today I want to tell you about an expansion of that mission.

From Day 1, our mission has been about getting the truth out to as many people as we possibly can.

But after being deleted, banned and censored by almost everyone out there, I realized pretty quick that we need a Parallel Economy!

We need to stop sending our dollars to the corporations that hate us and want to see us gone!

Remember the Georgia Guidestones?

They literally told us they wanted to reduce us from 8 billion people on the Earth down to only 500 million.

No big deal, right?

Just an elimination of 94% of all people living right now.

And yet we continue to shop at their big stores and send them our money, because until now we've had little choice.

Well, today that changes.

And today my mission EXPANDS...

And I'm SO excited!

Allow me to introduce you to the solution.

It's time to "Make The Switch" and change where you send your dollars each month.

What if I told you instead of sending your money to Jeff Bezos and Costco and Walmart, you could shop at the

LAST pro-America, freedom-loving, American designer, manufacturer and shipper of all the stuff you buy each month!

Oh, and what if I told you the products are BETTER and often CHEAPER?

Yes, for real.

And what if I told you this is the best kept secret you've never heard of before, but that this company has been doing this for the last 37 years?

And their founder was once placed on Barack Hussein Obama's list of the Top 10 most "Dangerous Conservatives" in America?

(a list I one day hope to make myself!)

All of that is real and I'm so excited to tell you about it and I hope you'll join the MISSION with me.

Here's a quick summary of this company that I'm so excited to now be partnered up with on this mission:

Family-owned
Manufacturer

Comparable Prices

Non-toxic Products For
Every Area Of Your Home and Life

Supports American
Jobs and Families

No Mainstream Advertising

Made in the USA

Sound good to anyone else?

Me too!

The reason you've never heard of them is because it's Invite Only.

I can get you in, but you can't just go sign up.

They only want people on the same mission to join and they're happy to say "no" to the Far-Left Libs!

They've been doing it for 37 years and it's been working great.

Oh, and did I mention the products are non-toxic and don't have all the chemicals and crap like Red Dye 40 that all the Big Corporations put in their products to weaken you?

To wear you down?

To make you — and your family — sick?

Because then when you get sick you'll buy their drugs!

Sorry folks, I don't play that game and neither does my family.

We're talking the LAST all natural, grass fed, no hormone, massive beef cattle ranch in the United States....

Sound good?

We're talking Fluoride Free Toothpaste, chemical free cleaners, Deet-free mosquito repellant!

What novel concepts, right?

Stop sending you money to these 11 corporations that do NOT have your best interest at heart:

Consumer Goods

More specifically non-durable consumer goods are the items we purchase and run out of month after month for our entire lives. The items like toothpaste, dish soap, laundry detergent, lotion, soaps, etc. By controlling the distribution of this category these corporations have created a predictable model of cashflow based on our buying habits.

The Illusion Of Choice

There are hundreds of consumer goods brands in our country and the vast majority of them are all owned and controlled by just a handful of mega-corporations. Even when you think you are buying natural products in many cases those natural companies have been absorbed by these giant corporations.

Where Does Your Money Go?

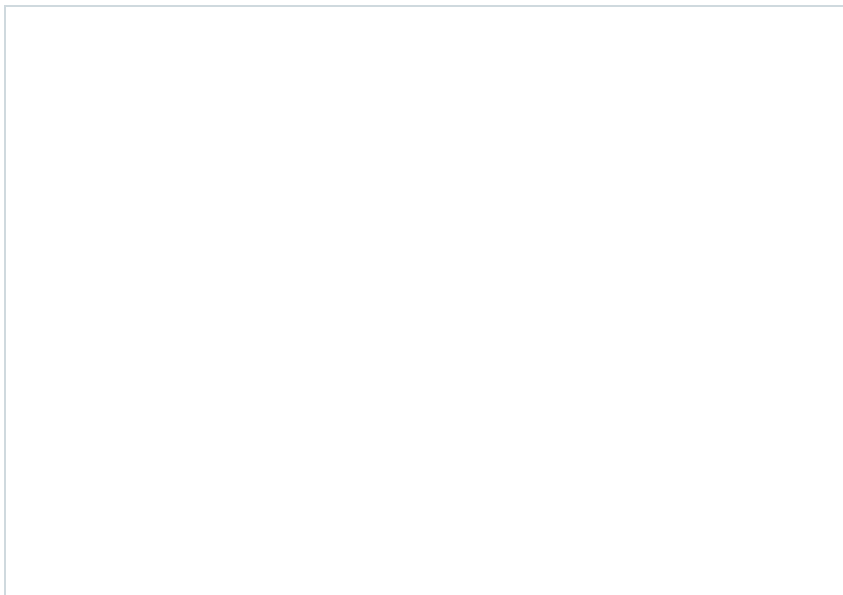

Studies show that nearly 63% of the price you pay for consumer goods add no value to the end consumer. Billions of dollars each year is used to purchase advertising with media companies, fund distribution and big box stores. Spending that money on better, safer ingredients and a company that supports freedom is a better option.

It's an ILLUSION of choice.

There's only one pro-American, American made and manufactured, chemical free, toxin free, hormone free, company left....and I'm teaming up with them to FIGHT BACK!

Who's with me?

As I said, it's Invite Only and the invite is completely free!

In fact, I've assembled a team of patriots who will personally get you invited and signed up....if you want in.

It's called "Patriot Switch" and I think the name says it all.

Folks, we don't have many strongholds left.

This is one.

And I'm all in.

If you'd like to find out more and get a FREE personal invite, just go here: <http://bit.ly/3E5K89d>

Tell them Noah sent you and I promise you will get a personal call, text or email.

Don't freak out when you do.

And make sure you tell them you are interested in the Black Angus beef!

I know I tend to get concerned when I get messages from numbers I don't recognize, but if you request a Free Invite (Link here: <http://bit.ly/3E5K89d>) you WILL have someone from my Inner Circle reach out to you....so be ready!

These are awesome people and I think you'll love getting a chance to talk with them.

And they'll help get you all set up.

Who's with me?

– Noah

p.s. Since everyone gets personal attention, we will take these in the order in which they come in. So if you are excited, ask for your invite now or you might be far down on the list. I have a great team, but they can only do so much and they'll work on a first-come, first-served basis.

Request a free Invite here: <http://bit.ly/3E5K89d>

So you die from hunger or by our governments food.

Some days it just don't pay to get out of bed.

BANK CRASH On Monday? The Federal Program Propping Up The Banks Ends On Monday!

Chorney Ren

3 hours ago

Don't thing to do: Go to your favorite supermarket and read the ingredients of packaged goods, like chips, snack cakes, and cereals. Below the many lines of ingredients is this horrible gem:

Bank Liquidity Crisis! Reports Of Customers Withdrawing Funds From Banks!

CONTAINS BIO-ENGINEERED INGREDIENTS

It's shocking how many items are now bio-engineered.

So much for eating fresh foods.

Britney Spears Fans Alarmed As Pop Star Posts Nude Beach Photos and Video

Injecting chemicals into foods to save corporations money as they reduce your longevity.

On the positive side, more sick people is good business for the medical community.

11-Year-Old Boy Reportedly Suffers Cardiac Arrest And Passes Away

With the rise of minority groups everywhere filling the quotas in medical schools and then becoming inept doctors who have zero originality or ability to think outside the box, your chance of dying in a hospital is far increased over 20-30 years
